

# SOUMYADEEP ROY

Agartala, Tripura

+91-7085637646 | soumyadeeproy145@gmail.com | linkedIn Profile | GitHub profile

## PROFESSIONAL SUMMARY

Aspiring Computer Science student with a strong foundation in Java. Eager to apply academic knowledge and hands-on project experience in a real-world setting. Seeking a full-time role to contribute to impactful software solutions. Passionate about solving complex problems through code and open-source collaboration.

## EDUCATION

|                                                                                                                  |                                  |
|------------------------------------------------------------------------------------------------------------------|----------------------------------|
| <b>VIT Bhopal University</b><br><i>Bachelor of Technology in Computer Science (Current CGPA: 7.70)</i>           | 2023 – 2027<br>Bhopal, MP        |
| <b>Bhavan's Tripura Vidya Mandir</b><br><i>Intermediate/Higher Secondary (Class 10: 83.4%   Class 12: 75.8%)</i> | 2009 – 2023<br>Agartala, Tripura |

## RELEVANT COURSEWORK

**Core CS:** Data Structures & Algorithms, Object Oriented Programming (Java), Database Management Systems, Operating Systems, Computer Networks  
**Web Technologies:** Frontend Frameworks  
**NPTEL Courses:** NPTEL Cloud Computing Certification, NPTEL Marketing Analytics certification

## TECHNICAL SKILLS

**Languages:** Java, SQL  
**Frontend:** HTML5, CSS3, JavaScript, React.js, Spring boot  
**Developer Tools:** Git, GitHub, VS Code, Jupyter Notebook  
**Container Orchestration Platform:** Docker, Kubernetes  
**Core Competencies:** Data Structures (DSA), Problem Solving, Team Leadership, Communication

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                          |                                   |

| <ul style="list-style-type: none"><li>Developed a deep learning model using VGG-16 architecture to detect and classify brain tumors from MRI scans.</li><li>Implemented image preprocessing techniques such as normalization and augmentation to improve model accuracy to over 90%.</li><li>Designed to assist medical professionals in early diagnosis, reducing manual screening effort.</li><li>GitHub Repository link</li></ul> |

**Algorithm Visualiser** | *HTML, CSS, JavaScript*

- Built an interactive web application to visualize algorithms such as Bubble Sort and Dijkstra's Algorithm.
- Designed a responsive interface allowing users to control visualization speed and input custom datasets.
- Simplified the learning process for peers through step-by-step graphical execution of algorithms.
- GitHub Repository link
